Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 7, 8 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Hartman et al. (US 7,146,031).

Regarding claim 1, Hartman discloses a methodology for imaging documents (X-Rays), said methodology comprising the steps of:

(a) creating at least one separator barcode sheet; (b) placing said at least one separator barcode sheet at the beginning of each new grouping of documents, wherein at least one level of groupings is recognized by at least one correspondingly distinct separator sheet type; (c) scanning said documents (col. 9, lines 37-67); and (d) verifying the continuity of said barcode separator sheets (col. 9 line 67 to col. 10 line 9).

Regarding claim 7, Hartman discloses the methodology of claim 1 wherein each of said barcode separators comprises a sheet of paper containing a barcode (col. 9 lines 37-48).

Regarding claim 8, Hartman discloses the methodology of claim 7 wherein at least one barcode separators further comprises textual or graphical information (col. 9, lines 37-48).

Regarding claim 11, Hartman discloses the methodology of claim 10 wherein said unique barcode comprises information representative of the format of a document (col. 9 lines 49-67).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hartman et al. (US 7,146,031) and further in view of Taylor et al. (US 5,704,602).

Regarding claim 12, the arguments under claim 1 apply to claim 12 as well. However Hartman is silent on how the barcode document is created. Taylor discloses automatic creation (labeler) of a banner (separator) sheet with identifying indicia printed on it (col. 1 lines 30-38). Therefore it would have been obvious to use such method in creating a barcode label to be used in Hartman's invention.

Allowable Subject Matter

5. Claims 2-6, 9, 10 and 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
